### Key & Guide to CTGFutures Market Analysis, Trading Plan & Nested Trading Strategy

#### CTGFutures Trading Plan - Market Analytics and Nested Trading Systems = Profits!

CTGFutures Weekly Trade Plan with Daily Updates is designed to be used in tandem with our Nested Trading Systems

#### Step 1

Our market analysis suggested selling the USDCAD pair. This information was posted in our Weekly Plan and Daily Updates for April 6/2009

#### Step 2.

We run our Market Director system on a 150 Tick chart of USDCAD - Note the a Sell Signal occurs at 4:27 AM NY Time. We now have confirmation of a short market.

#### Step 3.

While the 150 Tick is holding a short position, we set our Trigger system, running on a 10 Tick chart to automatically Sell the market when the Trigger system issues Sell Signals. The Trigger System will automatically close out the short when it detects a potential run up.

On the 10 Tick chart at the left a Sell Signal was issued at 7:01 AM NY Time. The market was sold at 1.2338. It was covered automatically by the Trigger system at 9:40 AM NY Time at 1.2258 for a profit of 80 PIPS.

#### NSS = Nested Short System Signals NLS = Nested Long System Signals

Mkt: >>>> Symbol for Futures/FOREX Market and Active month.

DAY CTG System: >>>> 12345/12345 = market is short/long from this number based on CTG Daily Systems
